Тихонкова Ірина, к.б.н.

Інформаційно-аналітичні ресурси та навчання

13 квітня 2021

План

- пошук робіт науковця в Web of Science.
- Поєднання колекцій документів,
- створення/ корегування профілю Publons,
- додавання публікацій,
- отримання Researcher ID.

Розповсюдженість прізвищ

1. Чи - більш ніж 100 мільйонів осіб

Чи найпоширеніше прізвище в світі, в основному в Китаї, і в цьому немає нічого дивного, так як це прізвище походить від китайського ієрогліфа Лі. А Китайців на планеті мільярд і хоча їх мільярд, але схоже що з фантазією у них погано, виявляється, що на всіх китайців припадає всього 450 прізвищ. Самі розумієте, що відсоток людей носять прізвище Лі дуже високий, приблизно 7,9 відсотка населення Китаю, тим більше вона також поширена у В'єтнамі.

2. Чжан - приблизно 100 мільйонів осіб

Чжан є також однією з найбільш поширеною китайської прізвищем. У Книзі рекордів Гіннеса за 1990 рік, вона була відзначена як найбільш поширене прізвище в світі. Вона також посідає третє місце в Китаї на початок 2006 року. Перше ж згадка цього прізвища в літописах зафіксовано приблизно 4000 років тому.

3. Ван - більш 93 млн. людина

Ван (титул) - Титул правителів держав і князівств в Китаї, Кореї та Монголії в давнину і Середні століття. Ван (прізвище) - Широко поширена китайська прізвище Ван (приставка) - Приставка до голландських прізвищами.

Пошук за автором

The screenshot displays the Web of Science search interface. At the top, a navigation bar includes links for 'Web of Science', 'InCites', 'Journal Citation Reports', 'Essential Science Indicators', 'EndNote', 'Publons', 'Kopernio', and 'Master Journal List'. On the right side of this bar are 'Iryna', 'Help', and 'English' dropdown menus. Below the navigation bar, the 'Web of Science' logo is on the left, and the 'Clarivate Analytics' logo is on the right. A secondary navigation bar contains 'Tools', 'Searches and alerts', 'Search History', and 'Marked List'. A message states 'We're building the new Web of Science.' with a button 'Click here to access the preview'. A dropdown menu for 'Select a database' is set to 'Web of Science Core Collection'. Below this, a purple arrow points to the 'Author Search' tab, which is highlighted. Other tabs include 'Basic Search', 'Cited Reference Search', 'Advanced Search', and 'Structure Search'. The search input field contains the text 'Example: oil spill* mediterranean'. To its right is a 'Topic' dropdown menu, a 'Search' button, and a 'Search tips' link. Below the search field are '+ Add row' and 'Reset' options. A 'Timespan' dropdown is set to 'All years (1900 - 2020)', and a 'More settings' dropdown is visible at the bottom left.

Як визначити індекс Гірша науковця за Web of Science

The screenshot displays the Web of Science search interface. At the top, there is a navigation bar with links to various services: Web of Science, InCites, Journal Citation Reports, Essential Science Indicators, EndNote, Publons, Kopernio, and Master Journal List. On the right side of the navigation bar, there are user and language options: Iryna, Help, and English. The main header features the 'Web of Science' logo and the 'Clarivate Analytics' logo. Below the header, there is a search bar with a dropdown menu set to 'Web of Science Core Collection'. The search options include 'Basic Search', 'Author Search' (marked as BETA), 'Cited Reference Search', and 'Advanced Search'. The 'Author Search' section is active, showing 'Name Search' and 'Web of Science ResearcherID or ORCID Search'. A purple arrow points to the 'Name Search' tab. Below this, there is a text box explaining: 'Search for an author to see their author record. An author record is a set of Web of Science Core Collection documents likely authored by the same person. You can claim and verify your author record from your author record page.' The search form has two input fields: 'Last name' with the text 'SHARAPOV' and a dropdown menu showing 'SHARAPOV' and 'SHARAPOVA'; and 'First name and middle initial(s)' with the text 'S'. A purple arrow points to the 'First name and middle initial(s)' field. To the right of the input fields is a 'Find' button and a link 'Need help searching?' with an information icon. At the bottom of the page, there is a footer with the Clarivate logo and copyright information.

Beamplots

How to read this beamplot

Each purple point on the beamplot represents an article. Its position shows its year of publication (y-axis) and its **citation percentile** (x-axis).
Hover over a publication(s) to see the publication information.
Articles published in the current year are not plotted in the beamplot.

● One publication ■ Two publications ■ Three or more publications

The annual median shows you the average citation percentile of all publications from the same year.

○ Annual percentile median

The grey dashed line shows the overall citation percentile median of all publications in the beamplot.

Author Impact Beamplots, INSPEC, RIS export and more ...

Web of Science Author Impact Beamplots

Web of Science Author Impact Beamplots are a brand-new visualization on every Web of Science Author Record. They show the citation performance of an author's entire publication list in a single view and show more context than a single metric like a citation count or h-index can provide.

Each dot on the beamplot represents a publication and its position corresponds to its year of publication and its normalized citation percentile score (0-100). A score of 90 means that paper is among the top 10% most cited publications of the same year, publication type (article or review) and subject area (e.g., applied physics). A score over 50 indicates above average citation performance.

Unlike single point metrics, Author Impact Beamplots help you:

- understand the narrative behind citation performance,
- see performance change over time, and
- make more informed decisions about research impact and evaluation.

Прочитати

Percentiles

Because citation distributions are strongly skewed, percentiles provide a good measure of central tendency.

90%+

score means that a paper is among the 10% most cited in the field

When comparing citation counts, it is important to account for variation in how citations accumulate across different fields. Differences in the volume of papers published, the average number of references made (citation density) and the tendency to cite older or more recent work all affect the rate at which citations accrue. Hence, it is common for bibliometric indicators to account for these differences using normalization – the comparison of citation counts to a reference set (or benchmark) that is based on:

- Papers published in the same year

Using a reference set enables comparisons of citation counts across disciplines. However, the underlying skewness in the distribution of citations is also a problem. Many papers are never cited, most will only collect a few and a very small number will gather hundreds and perhaps thousands of them. This skew means traditional measurements, such as the mean or median, do not accurately convey the average (central tendency) because the data are not normally distributed.

A simple way to address this problem is to use percentiles instead of the raw citation counts. We illustrate this in Figure 2 where the distribution of citation counts is shown for organic

chemistry articles published in the Web of Science in 2015. In purple (left axis), the number of citations received is plotted from 462 on the left (the highest citation count), all the way to 0 on the right and shows the characteristic long-tail distribution. In green (right axis), the corresponding percentile is shown, starting on the left at 100 (for example, 100% of other articles in the distribution have a lower citation count) and dropping regularly down to zero. The figure highlights three points (30, 10 and 5 citations) to show percentile values. The steps that become more noticeable toward the right convey the discrete drops in citation count, with the final step denoting the articles that received just one citation.

Figure 2: Citation counts (purple, left axis) for 19,264 articles published in organic chemistry in 2015 and their corresponding percentile values (crimson, right axis)

Hirsch JE, PNAS, 2005

For the few scientists who earn a Nobel prize, the impact and relevance of their research is unquestionable. Among the rest of us, how does one quantify the cumulative impact and relevance of an individual's scientific research output?

In a world of limited resources, such quantification (even if potentially distasteful) is often needed for evaluation and comparison purposes (e.g., for university faculty recruitment and advancement, award of grants, etc.)

The screenshot displays the Publons profile for Roman Lesyk. The navigation bar includes 'publons', 'BROWSE', 'COMMUNITY', 'FAQ', a search icon, 'LOG IN', and a 'REGISTER' button. The breadcrumb trail shows 'Home > Researchers > Roman Lesyk'. The left sidebar contains 'Summary', 'Metrics', 'Publications', and 'Peer review', with a purple arrow pointing to the 'Peer review' link. The main content area is divided into three sections:

- Editorial board memberships:** Titled 'CURRENT MEMBERSHIPS', it lists several journals with checkmarks and 'WOS' labels. Purple arrows point to the checkmarks for 'Biopolymers and Cell' and 'Current Bioactive Compounds', and to the 'WOS' label for 'Chemistry and Chemical Technology'.
- Verified editor records:** Shows '(4) Scientia Pharmaceutica' with a 'WOS' label. A purple arrow points to the 'WOS' label.
- Verified reviews:** Lists reviews for various journals with counts and 'WOS' labels. Purple arrows point to the counts for '(14) Mini-Reviews in Organic Chemistry' and '(13) Journal of Applied Pharmaceutical Science'.

Перехід до Publons з Web of Science

The screenshot displays the Web of Science interface. At the top, navigation links include Web of Science, InCites, Journal Citation Reports, Essential Science Indicators, EndNote, Publons, and Kopernio. The main header shows 'Web of Science' and the Clarivate Analytics logo. Below the header, there are tabs for 'Search', 'Tools', 'Searches and alerts', 'Search History', and 'Marked List'. The search results section shows 'Results: 5' and a search query: 'AUTHOR IDENTIFIERS: (0-1697-2013)'. A dropdown menu is open over the 'Sort by' options, listing 'EndNote', 'Kopernio', 'Publons', and 'Usage Reports'. The 'Publons' option is highlighted. The search results list three articles, each with a checkbox, a title, author information, journal details, and citation counts. The first article is 'Immunohistochemical analysis of Ki-67, PCNA and S6K1/2 expression in human breast cancer' with 20 citations. The second is 'Generation and characterization of monoclonal antibodies to p70S6 kinase alpha' with 3 citations. The third is 'Serological identification of autoimmune reactive antigens in human thyroid cancer cells' with 2 citations. The interface also includes a 'Refine Results' section, a 'Publication Years' filter, and a 'Save to EndNote online' button.

Dear Iryna,

Thank you for contacting Publons.

A support case: #300314 has been opened with the information you provided. You will receive a response to your inquiry shortly.

Please use your case number: #300314 for future reference regarding this inquiry. If responding by email, **please do not modify or remove PUBLONS case number (not the SFDC) from the subject line, or make sure "Publons Case [#300314]" is in your response subject.** This will allow us to serve you quickly.

Sincerely,
Publons.

What is my Web of Science Author Record?

Modified on: Fri, 16 Oct, 2020 at 4:01 PM

What is my Web of Science Author Record?

An Author Record is a record of publications and citation metrics of an individual researcher. Any author with a paper indexed in the Web of Science Core Collection has an author record. Author Records can be viewed using Web of Science's Author search. You can find more information about this [here](#).

Author Records can be used as an overview of the Web of Science Core Collection indexed outputs of an individual researcher. This grouping is intended to aid in the evaluation of your research outputs. An Author Record in Web of Science can be "viewed as a set of results" and is then available for analysis in InCites and tracking in EndNote.

ORCID

Distinguish yourself in three easy steps

ORCID provides a persistent digital identifier (an ORCID ID) that you own and control, and that distinguishes you from every other researcher. You can connect your ID with your professional information — affiliations, grants, publications, peer review, and more. You can use your ID to share your information with other systems, ensuring you get recognition for all your contributions, saving you time and hassle, and reducing the risk of errors.

FIND OUT MORE ABOUT OUR MISSION AND VALUES

- 1 REGISTER**
Get your unique ORCID Identifier. It's free and only takes a minute, so register now!
- 2 USE YOUR ORCID ID**
Use your ID, when prompted, in systems and platforms from grant application to manuscript submission and beyond, to ensure you get credit for your contributions.
- 3 SHARE YOUR ORCID ID**
The more information connected to your ORCID record, the more you'll benefit from sharing your ID - so give the organizations you trust permission to update your record as well as adding your affiliations, emails, other names you're known by, and more.

The screenshot shows the ORCID website's sign-in page. At the top left is the ORCID logo with the tagline "Connecting research and researchers". To the right, there is a language dropdown set to "English" and a search bar labeled "Registry" with the text "Search the ORCID registry". Below this is a navigation bar with links for "FOR RESEARCHERS", "FOR ORGANIZATIONS", "ABOUT", and "HELP". The main content area features a "Sign in" form with fields for "Email or 16-digit ORCID ID" (with an example "example@email.com or 0000-0001-2345-6789") and "Password". A "SIGN IN" button is below the fields. Below the button are links for "Forgot your password or ORCID ID?" and "Don't have an ORCID iD yet? Register now". A purple arrow points to the "Register now" link. Below these are options for "Access through your institution", "Sign in with Google", and "Sign in with Facebook".

The screenshot shows a user profile for Iryna Tykhonkova. The navigation bar includes 'FOR RESEARCHERS', 'FOR ORGANIZATIONS', 'ABOUT', and 'HELP'. The profile header shows the name 'Iryna Tykhonkova' and a 'Biography' section. The 'ORCID iD' is highlighted in green, with the URL 'https://orcid.org/0000-0003-1115-3742' and a 'View public version' link. Below this are options to 'Display your iD on other sites', 'Public record print view', and 'Get a QR Code for your iD'. The 'Also known as' section lists 'Ірина Тихонкова, Ірина Тихонкова'. The 'Country' is 'Ukraine'. The 'Keywords' are 'SEREX, tumor-associated antigens, thyroid cancer, melanoma, antibody'. The 'Works' section is expanded, showing a list of publications. The first publication is 'PEER REVIEW IS THE CORNERSTONE OF SCIENTIFIC COMMUNICATION. PUBLONS IS AN INSTRUMENT FOR SCIENTISTS, JOURNAL MANAGERS AND ADMINISTRATORS', published in 2019 as a book-chapter with DOI 10.15407/akademperiodyka.391.085. The source is 'Crossref' and it is marked as a 'Preferred source'. The second publication is 'STRATEGY OF DEVELOPMENT OF A SCIENTIFIC PUBLICATION: Science Ukraine in the Global Information Space'. A 'COMBINE' button is visible above the list. A dropdown menu is open over the 'Add works' button, listing options: 'Search & link', 'Add ArXiv ID', 'Add DOI', 'Add PubMed ID', 'Import BibTeX', and 'Add manually'. A 'Помощь' (Help) button is in the bottom right corner.

**DOI (DIGITAL OBJECT IDENTIFIER) –
ОБЯЗАТЕЛЬНЫЙ ЭЛЕМЕНТ
СОВРЕМЕННОГО НАУЧНОГО ИЗДАНИЯ**

Появление IT технологий и Интернета коренным образом изменили не только издательский процесс, но и методологию поиска научной информации. Несмотря на наличие у большинства научных изданий собственных веб-сайтов часто возникают сложности с поиском конкретной публикации. В конце 1990-х годов было предложено использовать *doi* (*digital object identifier*) идентификатор шифрованного объекта для создания постоянных гиперссылок, которые бы работали (приводили нас к искомому веб-страницам) даже при изменении структуры сайта. За эти годы данный индекс стал широко использоваться как научными изданиями, так и учеными, а дополнительные возможности, которые предлагаются фирмой *CrossRef* становятся обязательными для журналов высокого уровня. К сожалению, на сегодняшний день *doi* имеют лишь два украинских журнала, еще у нескольких он предоставляется для переводных версий журналов, переиздающихся за рубежом. Целью данной статьи является ознакомление с возможностями *doi* и других приложений *CrossRef* и практические рекомендации для журналов как получить данный индекс.

Как известно, каждое исследование начинается с детальной проработки литературы по интересующей тематике. В "доинтернетовскую эпоху" в библиотечный день ученый отправлялся в библиотеку, просматривал каталоги новых поступлений, в заинтересовавшей его статье обрабатывал списки использованной литературы, после чего начинал поиски первоисточников, которые, зачастую, были достаточно трудоемкими, а ожидание журнала с нужной статьей занимало дни или недели. Интернет коренным образом изменил поиск научной информации, но по-прежнему существуют некие подводные камни, о которых необ-
