

Світова практика упровадження та використання **OJS** як національної та транснаціональної видавничої платформи

Непран Наталія, зав. відділу НТБ НТУ “ХПІ”
707-68-88

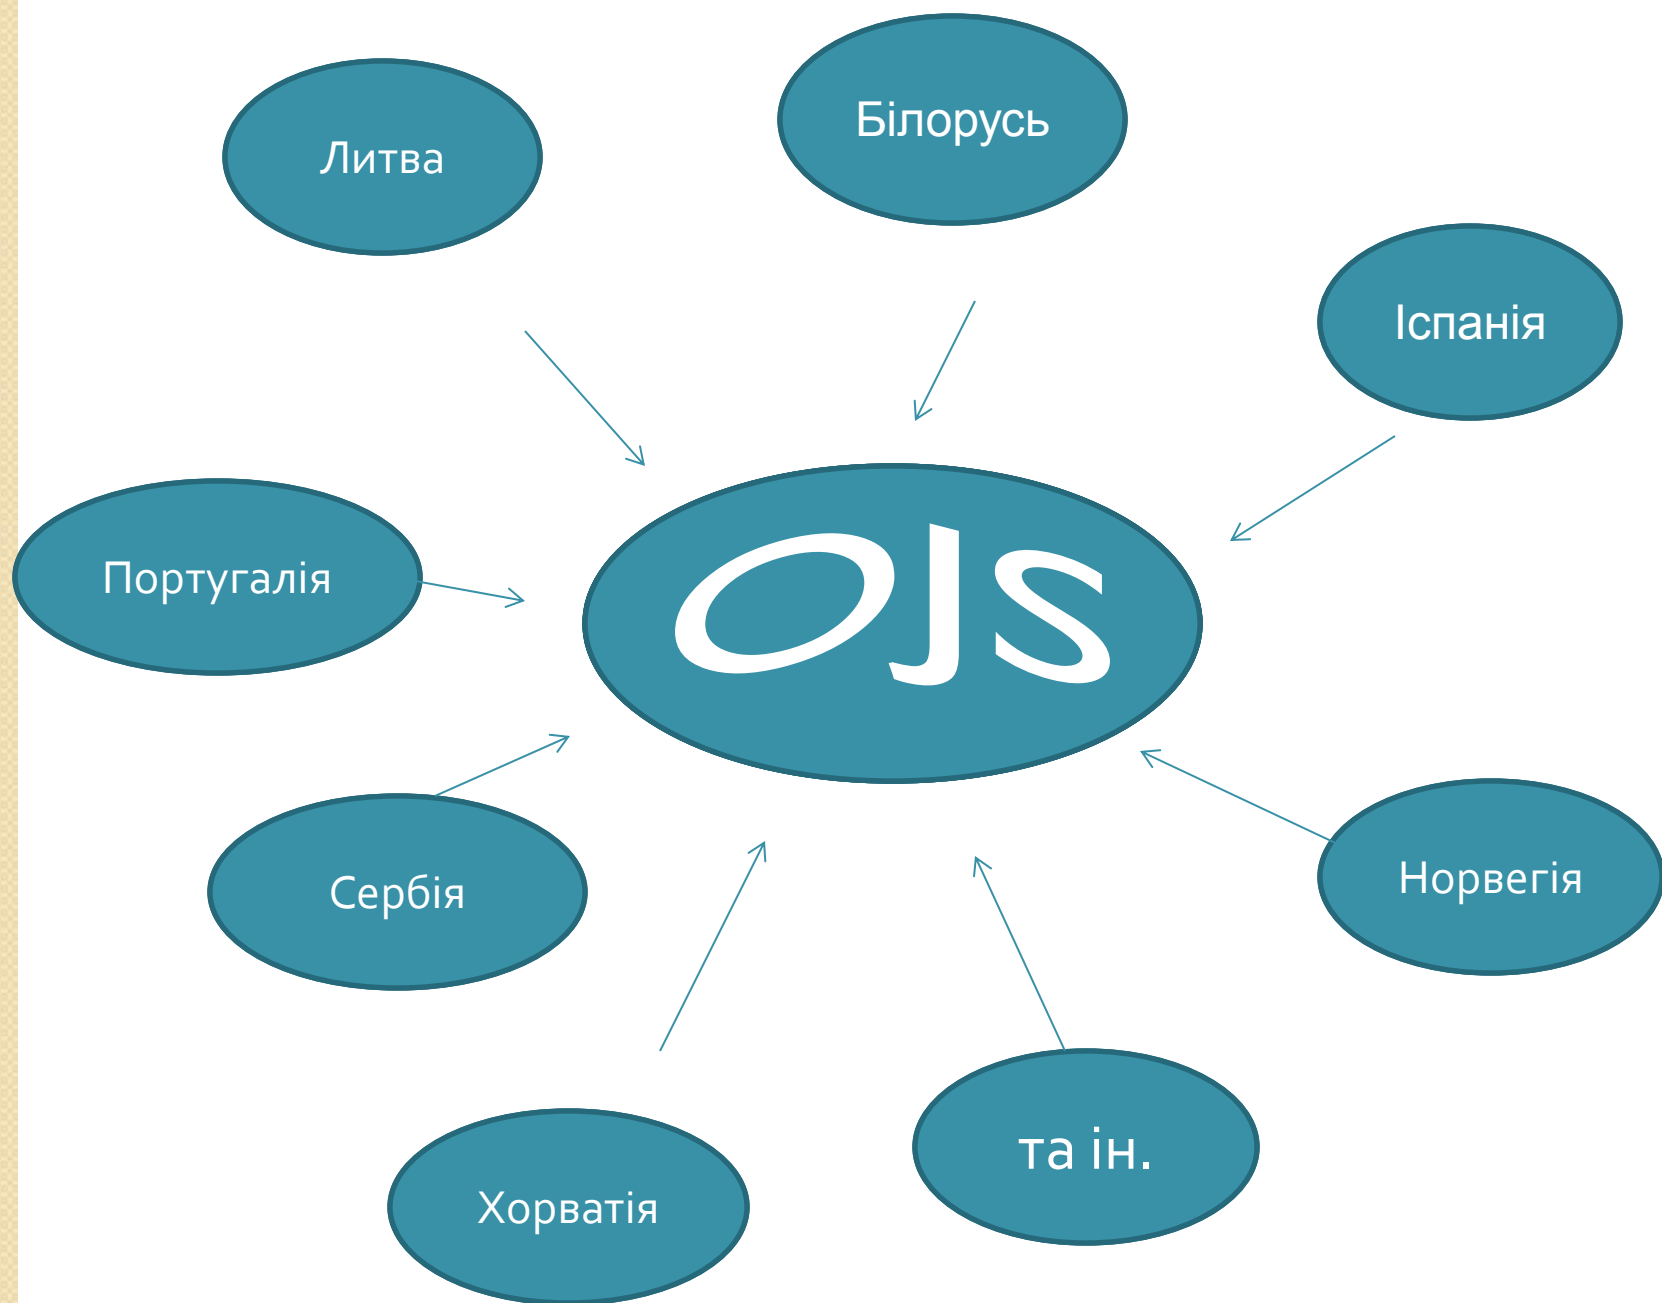

Open Journal Systems

*система управління і видавництва наукових журналів, що розроблена в рамках проекту **Public Knowledge Project** з метою розширення і поліпшення доступу до результатів наукових досліджень.*

Open Journal Systems

В окремих державах впровадження OJS функціонують як національні або транснаціональні журнальні платформи.

Станом на липень 2012 р. у світі нараховується понад 15 тис. впроваджень цієї системи.

Створення та налаштування OJS

Revista Organizações em Contexto

- nice example of multiple journals in a single installation
- consistent design across all journals

A Sample of Journals Using Open Journal Systems

This is not a comprehensive list of the over 11,500 titles using OJS (as of December 2011), but includes those who have indicated an interest in being listed, and is intended to illustrate the diversity of journals using system.

Because this list is intended to showcase journals using OJS **it does NOT include any non-OJS journals**. If your non-OJS journal is looking for inclusion in an open access database, we strongly recommend the [Directory of Open Access Journals](#).

If your OJS journal is not on this list, and you would like it to be considered for inclusion, please register it using [this form](#).

Open Journal Systems: Possibilities of the Lithuanian Research

Tuesday, 29 March 2011 14:48

The aim of the project is to acknowledge the Lithuanian research journal publishers and *Open Journal Systems* (OJS) which is a wide-spread research journal electronic publishing system and for publishing and distribution of the Lithuanian research journals. This project will include workshops in Vilnius, Kaunas and Šiauliai. The participants of the workshop will learn about the *Open Journal Systems* line management of all the research journal publishing stages, from manuscript submission to publication, digital object identifiers (DOI) and possibilities of implementing plagiarism prevention (*CrossRef*). Journals will be presented at the workshop.

A trial journal version in English and Lithuanian will be prepared for the purpose of the project. Editors will be published. In order to attract the attention of more editorial boards of the Lithuanian journals, information about the project will be announced at the workshops organized by the Association of Lithuanian Serials as local and international scholarly conferences.

Should you wish to be updated on the workshops, please register to the seminars by sending an email to vadyba@moksloperiodika.lt

Workshops will take place in:

Kaunas – 10 May (Tuesday) 1.00 p.m., Kaunas University of Technology, Central campus, III a., 301 a. [How to find it?](#)

Vilnius – 11 May (Wednesday) 12.00 a.m., VGTU Architecture campus. Video conference

Title: Acta chirurgica iugoslavica

ISSN: 0354-950X

First published: 1953

Frequency: quarterly

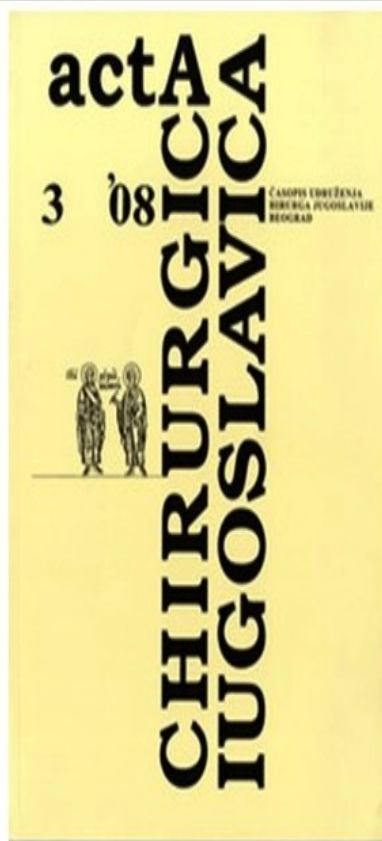

Subject: clinical medicine

Description: ACTA CHIRURGICA IUGOSLAVICA (ACI) je zvanični časopis Udruženja hirurga Jugoslavije. ACI publikuje originalne radove iz svih specijalnosti hirurgije i srodnih medicinskih grana, stručne radove, prethodna saopštenja, prikaze slučajeva i hirurških tehnika, revijske radove po pozivu, radove sa kongresa i stručnih sastanaka hirurga, pisma glavnom uredniku, izveštaje sa značajnih kongresa i sastanaka hirurga u zemlji i inostranstvu, preglede stručne literature i sve informacije od značaja za razvoj hirurgije u Jugoslaviji. Radovi i apstrakti sa kongresa i stručnih sastanaka hirurga publikuju se kao supplementum.

Fistula in ano: an overview

R John Nicholls

Perianal fistula is a very unpleasant condition. It is also quite difficult to be solved without recurrence or with complete preservation of sphincter function. This paper summarizes the etiology, classification of fistulas along with the long term surgical experiences in the approach and the treatment of this condition.

Key words: perianal fistula, preservation, sphincter function

NATURAL HISTORY

The patient with fistula is often young. The sex ratio is about 2/1 in favour of males. There appears to be a higher incidence in patients from the Mediterranean littoral, Middle East and Indian subcontinent.

There may have been a previous history of anal abscess. The main symptom is discharge of pus from the external opening. This may vary in volume depending on the presence of secondary abscess formation. In this circumstance, the patient may suffer exacerbations of symptoms of abscess including pain and fever, which are relieved by discharge of pus only to recur at some time in the future.

The discharge may require the application of several pads per day. The pus may smell. These symptoms are extremely distressing for the patient. They should not be underestimated.

Very rarely a fistula persisting for many years may de-

Anal abscess is the most common condition presenting to emergency departments. Usually it is just a painful unpleasant experience for the patient, but occasionally it can be severe and even life threatening. It is not to be taken lightly and the surgeon should realize that the abscess may be too deep to cause cellulitis of the perianal area. In a patient with pelvic pain and fever, a deep abscess should be considered. This will be demonstrated by a computerized tomographic (CT) scan.

It is helpful on first seeing the patient to consider overall management under the headings of

- 1) exclusion of associated disease,
- 2) identification of the surgical anatomy,
- 3) the decision whether the fistula is simple of complex, and
- 4) selection of the best treatment.

Associated disease

Patients with inflammatory bowel disease are at risk of anorectal sepsis. This includes those with extensive ulcerative colitis as well as those with Crohn's disease. In the former, about 5% of total proctectomy specimens will have an anal lesion, usually fistula or fissure. Crohn's disease confers a much higher risk however. The incidence of anorectal sepsis increases the more distal the intestinal involvement. Thus when this is confined to the small bowel it is about 10-15% but when the rectum is involved,

Bijdragen tot de Taal-, Land- en Volkenkunde

Bijdragen tot de Taal-, Land- en Volkenkunde is an interdisciplinary journal on Southeast Asia, and Indonesia in particular. The editors welcome articles from anthropology, history, political science, law, sociology, social geography, development studies, urban studies, literature, socio-linguistics, and economics.

It is NOT necessary to register for just viewing the articles published in the journals on this site. However, we encourage readers to sign up for the publishing notification service for each of the journals.

ANDREW BEATTY

Kala defanged

Managing power in Java away from the centre

Introduction: Topographies of power

In the anthropology of power there is a complex interaction between events on the ground, models of those events constructed by actors (explanations and charters, models of and models for), and the perspectives of outsiders trying to make sense of it all. Edmund Leach (1954) was among the first to explore this nexus of idea and action in *Political systems of Highland Burma*, since when discussion – at least in Southeast Asian circles – has oscillated, Kachin-style, between the serene idealism of Clifford Geertz (1980) in *Negara* and pragmatically minded, transactional approaches of the kind exemplified by Fredrik Barth (1993) in *Balinese worlds*.

Java has a place in this story. The turmoil of its history – its feuds and famines, conquests and colonizations – contrasts with its cultural emphasis on permanence, its refined rage for order. As Schrieke (1957) long ago showed, the continuity of Javanese history consists precisely in an *emphasis* on continuity, each ruler assuming not simply the temporary reins of power, but its lasting symbols. However different their practical circumstances, however irregular their claims to authority, successive leaders saw and projected themselves

absorb ink as non-absorbent and absorbent material. As an absorbent material matt coated paper, defined as type 2 according to ISO 12647-2:2004 (100 g/m²), was used. PVC foam (Forex) thickness of 3 mm was chosen as a non-absorbent substrate. Printing on both materials was conducted with inks based on nitro thinners (Sericol Trichromatic Plastijet TG).

Test image was created by means of Adobe Illustrator CS4 software, containing different elements used for print quality control as shown on Fig. 1. Test image dimensions was 29,7 x 42 cm. Elements assessed were lines (1 and 2 pt width), different text sizes ranging from 6-18 pt, micro and macro areas filled with black and area of 30% tonal value for black ink.

Screens with thread counts of 90, 120, 140 and 160 threads per cm were used for printing plates. Screen carriers were metal frames (58x84 cm), while the size of printing plates without a metal frame was 50x76 cm. Printing plates were made conventionally using linearized positive films. Maximum film density was 3,9, while minimum was 0,04. Film liniture was 5 times lower than the screen thread count and screen

angles were set as: yellow 0°, cyan 150°, magenta 45° and black 75°. As a photo sensitive coating we use Sericol Dirasol 915 emulsion. Exposure was performed with metal-halogen UV lamp (1000W), where the distance from lamp to screen measured 1 m. The exposure time for each printing plate was determined by using Autotype Exposure Calculator from Sericol. Table 1 summarizes different exposure times for each screen thread counts used for testing.

Table 1. Exposure time for each screen thread counts used

Screen thread counts (threads per cm)	Exposure time (min)
90	2,5
120	2
140	1,3
160	1

After exposing, printing plates were washed with water under pressure for 2 minutes and dried on a temperature of 39 °C for one hour.

Printing was performed on M&R Sportsman E Series, 6 colour screen printing press. Pan et

AVISO: Nesta fase de construção da plataforma, aconselha-se a consulta do sitio anterior em [Finisterra](#).

A Finisterra é uma das principais revistas portuguesas de Geografia. Publica artigos e notas dedicados à investigação em diversas vertentes da Geografia física e humana, Recursos e Riscos ambientais, Planeamento regional e local, Ordenamento do território, Desenvolvimento regional e local, Sistemas de Informação Geográfica, entre outros temas. O controlo de qualidade dos textos submetidos é efectuado através de editor, conselho editorial e arbitragem por pares ("double-blinded"). A Finisterra representa uma plataforma privilegiada para os jovens e os investigadores seniores, bem como estudantes universitários e agentes de planeamento. A Finisterra publica em Português e Inglês, assim como em Francês, Espanhol e Italiano. Estão incluídos, em cada artigo, resumos e palavras-chave em três idiomas.

JOURNAL OF HEALTH SCIENCES (J OF HEALTH SCI)

Journal of Health Sciences (J Health Sci) of Radom University in Radom, Poland Journal of Health Sciences is a journal launched in 2011 publishing peer-reviewed scientific papers of significance in all areas of medical sciences from basic research to clinical and experimental study. The Journal aims at establishing itself as the leading international journal in medical and biological sciences. We publish original scientific studies, review and educational articles, and papers commenting on the clinical, scientific, social, political, and economic factors affecting health.

The journal has had 4 points in Ministry of Science and Higher Education parametric evaluation. List B item 667.

Declaration on the original version.

Because of the parallel version of the magazine publishing traditional (paper) and of electronic (online), Editors indicates that the main version of the magazine is to issue a "paper".

Abstract

Background: Nowadays, Musculoskeletal Disorders (MSDs) are the most common problems in the workplaces. Non-ergonomic workstation and job design lead the workers to expose to various kinds of risk factors that cause MSDs. In this study, Rapid Upper Limb Assessment (RULA) and Nordic musculoskeletal questionnaire (NMQ) were used for assessing the risk of cause musculoskeletal disorders (MSDs) at a TV manufacturing company.

Methods: In this cross-sectional study, 50 workers were selected randomly from assembly lines workers. Then RULA method was performed and NMQ was completed for workers too. Jobs were categorized into two parts of safe and unsafe jobs and musculoskeletal disorders risk

OJS @ Queen's University

Publish and manage your online journal with OJS. Open Journal Systems (OJS) is open source software installed by Queen's University Library for use by Queen's faculty and staff wishing to publish an online open-access or subscription-based journal. OJS supports all aspects of journal publishing including peer review, tracking subscriptions, copy editing, etc. OJS is a research and development initiative of the Public Knowledge Project. Its continuing development is currently overseen by a partnership among the University of British Columbia, the Simon Fraser University Library, and the Canadian Center for Studies in Publishing.

Federalism-E

Federalism-E is an electronic student journal about federalism and multi-level governance put forth in collaboration between l'Université Laval and Queen's University. This annual journal will publish papers by undergraduate students, which are reviewed by an editorial board composed of their peers, in both English and French languages.

It is a bilingual, undergraduate electronic journal about federalism with a mandate to provide a forum to encourage research and scholarly debate with respect to a wide variety of issues concerning federalism, such as political philosophy, multi-level governance and inter-governmental relations. Research conducted spans a wide variety of issues and promulgates a similar variety of opinions. The journal's aim is to create an atmosphere of debate and investigation to highlight the multi-faceted study of federalism and the utility in doing so.

University of Edinburgh Journal Hosting Service

The Digital Library at the [University of Edinburgh](#) uses OJS (Open Journal Systems) to provide a platform for academic staff and student groups to publish Open Access journals.

If you are interested in setting up a journal, or would like more information about the service, please visit the Library web pages: [Journal Hosting Service](#) or email the [Digital Library](#).

The South Asianist

The South Asianist is an interdisciplinary academic journal intended to spur critical debate on social, environmental, cultural, linguistic, religious, political and economic aspects of South Asia. At its core is the felt need to counter the distancing effect that stilted, formulaic academic writing often creates. Provocative, peer-reviewed essays and reviews will be complemented by video vignettes that include interviews as well as mini-documentaries that seek to reflect the energy of ethnographic work.

Memorial University Libraries - Electronic Journals

The Electronic Journals platform provides a full suite of services for creating and hosting on-line journals, including mechanisms for article submission, peer-review workflow, journal layout, reader access, and long term archiving. OJS will be of interest to Memorial University faculty who are planning to launch a new electronic journal, those who are looking for an electronic delivery platform for journals that currently exist only in paper, or those who would like to repatriate an electronic journal currently hosted elsewhere. Students will also be welcome to participate in the project, and the library will provide technical support to those interested in creating an on-line journal, or an on-line version of an existing journal. For more information please contact [Lisa Goddard](#).

Intersectionalities: A Global Journal of Social Work Analysis, Research, Polity, and Practice

Intersectionalities is a peer-reviewed, open access journal sponsored by Memorial University's School of Social Work. The journal is international in scope, and publishes articles relating to social work analysis, research, polity, and

practice.

[VIEW JOURNAL](#) | [CURRENT ISSUE](#) | [REGISTER](#)

at the EDGE

At the Edge is a peer-reviewed, open access online journal that showcases the work of emerging scholars, particularly in the fields of eighteenth- and nineteenth-century literature and culture, or on Romanticism very broadly defined. *At the Edge* welcomes submissions from a wide variety of critical, theoretical, and interdisciplinary perspectives. In addition to essays that take more traditional approaches to literary and cultural research and writing, we strongly encourage innovative and creative forms of scholarly engagement that expand the genre of academic writing to reflect the changes and possibilities of publishing in a digital environment.

Collected Essays on Learning and Teaching

Collected Essays on Learning and Teaching (CELT) publishes peer-reviewed scholarly and practice-based articles associated with the annual conference of the Society for Teaching and Learning in Higher Education (STLHE). Now in its fifth volume, the intent is to challenge conference presenters to convert the essence of their peer-reviewed sessions into essay form for a wide readership interested in teaching improvement practices in higher education.

The present Volume of CELT reflects the work of over 60 authors who presented in Saskatoon in 2011 at the STLHE conference hosted by the University of Saskatchewan.

[Please feel free to explore Volume V](#) in the order most convenient to you, and to print out one or more of the articles to read and to consult at your leisure.

settler colonial studies

settler colonial studies is a peer reviewed academic journal, which is published twice a year. We have established it to respond to what we believe is a growing demand for reflection and critical scholarship on settler colonialism as a distinct social and historical formation.

JOURNAL CONTENT

Search

All

We aim to establish settler colonial studies as a distinct field of scholarly research. Scholars and students will find and contribute to historically-oriented research and analyses covering contemporary issues. However, we also aim to present multidisciplinary and interdisciplinary research, involving areas like history, law, genocide studies, indigenous, colonial and postcolonial studies, anthropology, historical geography, economics, politics, sociology, international relations, political science, literary criticism, cultural and gender studies and philosophy.

FONT SIZE

This journal will be considering original feature articles, review articles, and proposals for thematic issues.

This is the University of Alberta Libraries' electronic journal hosting service using the Open Journal Systems (OJS) publishing software. If anyone on your editorial team is a member of the University of Alberta community and you are interested in using the OJS system and our free hosting service for publishing your open access electronic journal, please contact your [liaison librarian](#). For more information, see the [Memorandum of Understanding](#) for our service. We also permit loading of digitized backfiles and provide hosting services for journals that have ceased publication but would like to distribute their content electronically.

General inquiries may be sent to: Amanda Wakaruk, Open Journal Systems Manager (Acting), University of Alberta Libraries amanda.wakaruk@ualberta.ca Do you have a question about a particular journal? If so, refer to the contact information found in the 'About' section on each journal's individual website.

aboriginal policy studies

aboriginal policy studies is a new online, peer-reviewed and multidisciplinary journal that, on a bi-annual basis, publishes original, scholarly, and policy relevant research on issues relevant to Métis, non-status Indians and urban Aboriginal peoples in Canada. We encourage the submission of articles by and for a wide audience of scholars, researchers, community activists, and policymakers. Though focused on the Canadian milieu, we welcome comparative work from an international Indigenous context pertinent to Canadian readers. A similarly broad scope of methodological approaches is encouraged.

La revue *Études des politiques des Autochtones* est une publication en ligne pluridisciplinaire et évaluée par les pairs qui, deux fois par année, publie des recherches originales, érudites et relatives à la politique sur des sujets touchant les Métis, les Indiens non inscrits et les peuples autochtones vivants en milieu urbain au Canada. Nous invitons la soumission d'articles par et pour un vaste public d'érudits et

Forest Phytophthoras

Plant pathogens in the genus *Phytophthora* threaten the biodiversity and sustainability of forest ecosystems worldwide. The overall aim of this journal is to provide science-based information to aid in the understanding and management of the world's forest *Phytophthora* species. While newly emerging, damaging species are the highest priority, information on other *Phytophthoras* is included in an attempt to gradually elucidate *Phytophthoras*' diverse roles in terrestrial and aquatic ecosystems.

Forest Phytophthoras is an open access, peer-reviewed, online journal. This journal provides immediate open access to its content on the principle that making research freely available to the public supports a greater global exchange of knowledge. Published articles are permanently archived with a unique digital object identifier (doi). Articles are available as html files and pdf files.

The publications will also be accessible via the Forest Phytophthoras of the World [website](#).

Umbrella

Umbrella is an art journal that began publication by Judith Hoffberg in 1978. The journal covers news and reviews of artist books, mail art and contemporary art and photography tradebooks. It includes interviews with leading book artists, alternative spaces as well as Fluxus artists. The journal ended print-copy publication in 2005 and moved to an online edition, 2006-2008.

Soon after ceasing hard-copy publication in 2005, permission was granted to the Herron Art Library of IUPUI University Library to digitize the 1978-2005 journal run and provide access over the World Wide Web. Permission was later extended to cover the electronic format as well. This collection contains the full journal run, print and electronic, 1978-2008. This is an important collection for the study of the genre. Online access has proved to be of great value to researchers. It is a great honor for the Herron Library to serve as a gateway to this resource and continue Judith's vision to provide access to the wealth of information provided across the collection. The library staff moved the Umbrella content into Public Knowledge Project's Open Journal System so that the journal will continue Judith's vision in an open-access environment. This collection is dedicated to the memory and important work of Judith Hoffberg.

CAMELS AND NEEDLES: COMPUTER POETRY MEETS THE PERL PROGRAMMING LANGUAGE

Sharon Hopkins Rauenzahn

ABSTRACT

Although various forms of literature have been created with the assistance of a computer, and even been generated by computer programs, it is only very recently that literary works have actually been written in a computer language. A computer-language poem need not necessarily produce any output: it may succeed merely by fooling the parser into thinking it is an ordinary program. The Perl programming language has proved well-suited to the creation of computer-language poetry.

[Editor's Note: This article appeared in The Perl Review 0.1 (2002): 37-49. Print.]

CAMELS AND NEEDLES: COMPUTER POETRY MEETS THE PERL PROGRAMMING LANGUAGE

Sharon Hopkins, Telos Corporation

ABSTRACT

Although various forms of literature have been created with the assistance of a computer, and even been generated by computer programs, it is only very recently that literary works have actually been written in a computer language. A computer-language poem need not necessarily produce any output: it may succeed merely by fooling the parser into thinking it is an ordinary program. The Perl programming language has proved well-suited to the creation of computer-language poetry.

INTRODUCTION

Over the past few decades, considerable work has been done in the area of computer-generated writing. Projects have ranged from programs designed to find simple anagrams, to dedicated pangram [1] generators, to entire poems or stories (usually nonsensical) produced by stringing together chains of words that occur next to each other in human-generated texts. One French group [2] went so far as to experiment with computer-generated writings that could be read in both French and English. A number of science fiction and fantasy stories have been written in the form of flow charts, or designed to appear as if they had been written in some programming language yet to be invented. But until very recently, little or no attempt has been made to develop human-readable creative writings *in an existing computer language*. The Perl programming language has proved to be well suited to the creation of poetry that not only has meaning in itself, but can also be successfully executed by a computer.

Why Computer Poetry?

The question naturally arises: Why write poetry in a computer language at all? Computer-language poetry is essentially no different from any other formal poetry, except that the rules of the computer language dictate the form the poem must take, and provide a mechanism for measuring success. If the poem executes without error, it has succeeded. The great advantage formal poetry has over free verse is the balance provided between familiarity and strangeness, stasis and innovation. When reading rhymed poetry, for example, the reader develops an expectation of how each line will end. The poet's task is to satisfy that expectation, by providing a rhyme, while surprising the reader with a word or meaning outside of his expectations. With computer-language poetry, the surprise is enhanced: the reader develops expectations as to what is going to come next based on familiarity with the standard uses of that language's vocabulary. In Perl, if the word `read()` appears, the person reading that Perl script will naturally expect the items in parentheses to be a filehandle, a scalar variable, a length value, and maybe an offset. The poet, finding `read()` in the Perl manual or reference guide, is more likely to write "read (books, poems, stories)". In the same way, `sin()` (of sine, cosine, and tangent) becomes `sin`, the downfall of man. Another advantage to writing computer language poetry, in addition to the challenge provided by the constraints of the form,

Наукові праці Вінницького національного технічного університету

Журнал «Праці Вінницького національного технічного університету» є науковим виданням, визнаним ВАК України як фахове видання у галузях технічних, економічних та педагогічних наук.

Журнал виходить на 3 мовах у on-line версії.

Він публікує статті, які містять нові теоретичні та практичні результати в галузях технічних, природничих та гуманітарних наук. Публікуються також огляди сучасного стану розробки важливих наукових проблем, огляди наукових та методичних конференцій, які відбулися у ВНТУ, статті з педагогіки вищої освіти.
