75 Jahre Chemie - Nachlese

***75 YEARS CHEMISTRY  
RE-READING***

Part II

*This volume is dedicated to my dear wife Nora  
whose birthday is on 23 April:*

*Without the help and commitment of Nora, the "Re-  
Reading" volumes would not exist in the form they  
have today - let us just think of the necessary  
computer, lay out and editing skills which are beyond  
the author's competence. Today, an author must be  
his own typesetter.*

*This alone would be reason enough for a dedication,  
but it seems particularly called for in Part II which  
deals with PROJ VI. The starting point of this  
project was GESAROL (later DDT). The author first  
heard ah out GESAROL through his friend Dr. Hajek  
at Easter 1943 (23 April!). At Easter 2011 when this  
dedication was written, we have come full circle.*

*First GESAROL experiments in May 1943:p. 658 and  
(408). The reader will learn in projects VI to XIII, but  
also IV what the author made of it.*

*Randolph Riemschneider,  
Berlin 2011*

**TABLE of CONTENTS**  
**of**  
**Part II**

**Introduction**

**PROJECT III** (abbreviated version)

*cis, trans*-Asymmetry  
axis-ring molecular aggregates  
HD-asymmetry  
conversion isomerism  
sterically hindered ethers

**PROJECT IV**

Thiocarbamates, R-S<sub>2</sub>CNH<sub>2</sub>, from thiocyanates „Riemschneider’s Reaction”  
Benzothiazole derivatives - dequatemizing nucleophilic substitution of benzothiazoliumsalts  
Thiocyanates, thioethers, thiolic acids  
Industrial activities of the author:  
in Brazil: “Thiocarbamates, Carbamates” - “Sangue artificial”  
in Japan: “Ulcustherapeutikum CELLRYL” - “EVANGILE” (Pola)

**PROJECT V**

Iodine substitution methods and other analytical and methodical papers  
Plant technology I, II, and III  
BSE crisis - Alternative solutions

**PROJECT VI**

Halocarbon-based contact insecticides synthetic compounds  
PEST CONTROL based on natural compounds  
New ways of PEST CONTROL

**PROJECT VII**

Reflections on the “Constitution and Action” and on the “Configuration and Action” within certain groups of low molecular substances.  
The spatial structure and activity of representatives of groups: a) DDT: PROJ VII, b) HCH and DIENE: PROJ VIII, IX, XI, c) thalidomides, atebaines, and barbituric acid analogues: PROJ VII  
APPENDIX: Permeation studies

**Looking back on Part I**
