Аерокосмічний Університет ім. М.Є. Жуковського «ХАІ», м. Харків

Затверджено редакційно-видавничу радою університету

(протокол № 2 від 07.12.2011 р.)

Розглядається теоретичний матеріал з наступних розділів: диференціальне числення функцій багатьох змінних, кратні та криволінійні інтеграли. В посібнику також включено задачі, що рекомендовано для розв'язання в аудиторії разом з викладачем, а також домашні завдання. Для кожної теми пропонуються варіанти контрольних завдань.

Призначено для студентів та викладачів технічних спеціальностей.

К93      Differential and integral calculus for functions with several variables =

Диференціальне та інтегральне числення функцій багатьох змінних : навч. посіб. / Л. В. Курпа, Т. В. Шматко. - Х. : НТУ "ХГП", 2012 - 252 с. - Англ. мовою.

ISBN 978-617-05-0030-4

Theoretical material of differential calculus of several variables, multiple and curvilinear integrals is proposed. This educational textbook includes problems that are recommended to solve as classwork and as homework. Variants of individual tests are created for each subject.

For students and teachers of technical specialties.

## CONTENT

### **INTRODUCTION\_3**

### **CHAPTER I.**

<b>DIFFERENTIAL CALCULUS FOR FUNCTIONS OF SEVERAL VARIABLES</b>	5
<b>1.1.</b> General Notations	5
<b>1.2.</b> Concept of Domain of Definition For Functions of Several Variables	9
<b>1.3.</b> Limit of Two Variables Function	13
<b>1.4.</b> Continuity of Two Variables Function	14
<b>1.5.</b> Partial and Total Increment of a Function	15
<b>1.6.</b> Practice Lesson №1. Evaluation of the Partial Derivatives	19
<b>1.7.</b> Differentiability and the Total Differential of a Function with Two Variables	24
<b>1.8.</b> The Sufficient Condition for the Differentiability of a Two Variables Function	26
<b>1.9.</b> The Derivative of a Composite Function. The Total Derivative	29
<b>1.10.</b> Total Derivative	32
<b>1.11.</b> Invariance of the Form of the First Order Differential	32
<b>1.12.</b> The Derivative of a Function Defined Implicitly	33
<b>1.13.</b> Practice Lesson №2. Differentiation of the Composite and Implicit Function	35

<b>1.14.</b>	Partial Derivatives of Higher Orders . . . . .	38
<b>1.15.</b>	Differentials of the Higher Orders. Total Differential . . . . .	44
<b>1.16.</b>	Practice Lesson №3. Derivatives and Differentials of the Higher Orders . . . . .	46
<b>1.17.</b>	Taylor's Formula for a Function of Two Variables . . . . .	49
<b>1.18.</b>	Maximum and Minimum of Several Variables Function . . . . .	50
<b>1.18.1.</b>	Extrema of Two Variables Function . . . . .	50
<b>1.18.2.</b>	Necessary Condition for Existence of an Extremum of Two Variables Function . . . . .	51
<b>1.18.3.</b>	The Sufficient Condition for a Function to Have an Extremum . . . . .	53
<b>1.18.4.</b>	The Case of a Function of Two Variables . . . . .	54
<b>1.19.</b>	Practice Lesson №4. Extrema of a Function . . . . .	61
<b>CHAPTER II.</b>		
<b>SOME APPLICATIONS OF THE FUNCTION OF SEVERAL VARIABLES . . . . .</b>		64
<b>2.1.</b>	The Equation of a Tangent Line to a Curve in Space . . . . .	64
<b>2.2.</b>	The Equation of a Tangent Plane and the Normal to a Surface . . . . .	66
<b>2.3.</b>	Practice Lesson № 5. Geometrical Applications of the Differential Calculus for Function with Two Variables . . . . .	73

<b>2.4.</b>	Maximum and Minimum of a Function of Several Variables Related by Given Equations (Conditional Maxima and Minima) .....	76
<b>2.5.</b>	Practice Lesson №6. Problems Connected with Finding Conditional Extremum .....	83
<b>2.6.</b>	Directional Derivative.....	85
<b>2.7.</b>	Gradient .....	88
<b>2.8,</b>	Practice Lesson №7. Gradient and Directional Derivatives .....	92
<b>2.9.</b>	Variants of the Control Tasks for Topic "Differential Calculus of the Function with Several Variables".....	95
<b>CHAPTER III.</b>		
<b>THE DOUBLE INTEGRAL .....</b>		100
<b>3.1.</b>	Some Problems Leading to Concept of the Double Integrals.....	100
<b>3.2.</b>	Double Integral and its Geometrical Sense	102
<b>3.3.</b>	The Main Properties of the Double Integrals .....	103
<b>3.4.</b>	Calculation of the Double Integrals in the Cartesian Coordinate System .....	105
<b>3.5.</b>	Practice Lesson № 8. Calculation of the Double Integrals in Cartesian System Coordinates.....	115
<b>3.6.</b>	Practice Lesson № 9. Calculation of the Solid Volumes in Cartesion System Coordinates.....	119
<b>3.7.</b>	Curvilinear Coordinates on the Plane .....	121
<b>3.8.</b>	The Element of Area in Curvilinear Coordinates .....	123

<b>3.9.</b>	<b>Change of the Variables in the Double Integrals .....</b>	<b>126</b>
<b>3.10.</b>	<b>Practice Lesson №10. Calculation of Double Integrals in Polar System of Coordinates .....</b>	<b>129</b>
<b>3.11.</b>	<b>Physical Application of the Double Integral .....</b>	<b>132</b>
<b>CHAPTER IV.</b>		
<b>TRIPLE INTEGRAL CALCULATION AND APPLICATION .....</b>		<b>135</b>
<b>4.1.</b>	<b>Definition and Properties of the Triple Integral .....</b>	<b>135</b>
<b>4.2.</b>	<b>Calculation of the Triple Integral in the Cartesian Coordinates System .....</b>	<b>136</b>
<b>4.3.</b>	<b>Practice Lesson № 11. Calculation of the Triple Integrals in Cartesian System Coordinates .....</b>	<b>141</b>
<b>4.4.</b>	<b>Triple Integral in Cylindrical and Spherical Coordinate Systems .....</b>	<b>145</b>
<b>4.5.</b>	<b>Some Rules of Finding Integration Limits in the Cylindrical and Spherical Coordinates. The Geometrical and Physical Applications of the Triple Integrals .....</b>	<b>148</b>
<b>4.6.</b>	<b>Practice Lesson N 12. Triple Integral in Cylinder and Spherical Systems of Coordinates .....</b>	<b>155</b>
<b>4.7.</b>	<b>Variants of Control Tasks for Topic "Multiple Integrals and its Applications" ..</b>	<b>159</b>

## **CHAPTER V.**

<b>CURVILINEAR INTEGRALS</b> .....	164
<b>5.1.</b> Curvilinear Contour Integral of the First Kind .....	164
<b>5.2.</b> Some Application of the Curvilinear Integrals of the First Kind. Calculation of Mass of Inhomogeneous Curve .....	166
<b>5.3.</b> Examples of Calculation of the Curvilinear Integrals of the I-st Kind .....	169
<b>5.4.</b> Practice Lesson № 13. Curvilinear Integral of the First Kind (Along Curve) .....	172
<b>5.5.</b> Curvilinear Integrals of the II-nd Kind (Line Integrals). Problem Leading to Concept of the Line Integral .....	175
<b>5.6.</b> Calculation of Line Integrals .....	176
<b>5.7.</b> Connection Between Line Integrals and Curvilinear Integrals of the First Kind .....	179
<b>5.8.</b> Examples of Calculation of Line Integrals of the II-nd Kind Indirectly .....	180
<b>5.9.</b> Green's Formula .....	183
<b>5.10.</b> Practice Lesson № 14. Curvilinear Integrals of the Second Kind (Line Integrals) .....	187
<b>5.11.</b> Condition for Line Integral to be Independent of the Integration Path .....	189
<b>5.12.</b> Condition for Existence of the Total Differential .....	193

<b>5.13.</b>	Finding Function by its Total Differential .	195
<b>5.14.</b>	Practice Lesson № 15. Independence of the Line Integrals From Form of the Integration Path. Finding Antiderivative ...	198
<b>5.15.</b>	Variants of Control Tasks to Topic "Curvelinear Integrals".....	200
