UDK 338.42(338.43)334.78

The paper presents a substantiation of theoretical-methodological levers and practical recommendations for the state regulation of integrated corporate associations under the conditions of the socioeconomic modernization of the national agrarian policy, the strengthening of the institutional uncertainty and informational asymmetry. The research generalizes findings of multi-year theoretical-analytical studies of authors and a practice of their expert-analytical activity, systemizes a heritage of domestic and foreign academic scientists of the agrarian and construction profile and the best national and native (local) practices of the provision of sustainable dynamics of agro-food value added chains, subject to functional transformation of the rural economy affected by processes of decentralization, land reform and modernization of the public finance management system, in general and state support (assistance) for rural development institutions; in particular.

For scientists, employees of bodies of state power, teachers, higher education applicants, specialists of civil society institutions of the agro-economic and construction profile.
