12 Fundamentals of computer systems architecture / (Gavrylenko S., Khatsko N. – Kharkiv : NTU “KhPI”, 2019. – 75 p.

ISBN 978-966-8944-91-8

In the study guide "Fundamentals of computer systems architecture" the questions of presentation of information in different systems of calculation, execution of logical and arithmetic operations are considered. Each chapter provides the necessary theoretical information, examples of presentation of information and examples of execution of arithmetic and logical operations, given tasks for self-execution and control questions.

For the students of specialties 121 – “Software Engineering” and 123 – “Computer Engineering”.

004.2; 004.6; 519.6

TABLE OF CONTENTS

INTRODUCTION.....	5
1 INTRODUCTION TO COMPUTER ARCHITECTURE.....	6
2 NUMBER SYSTEMS USED IN COMPUTER CALCULATIONS.....	13
2.1 Number systems used in computer calculations.....	13
2.2 Conversion of a number from one number system to another. Examples....	17
2.3 Exercises.....	18
2.4 Control questions.....	21
3 REPRESENTATION IN OPERATIONAL MEMORY.	
LOGICAL OPERATIONS.....	22
3.1 Representation of information in a computer.....	22
3.2 Typical computer registers.....	23
3.3 Representation of numerical information in a computer.....	25
3.4 Bitwise operations. Logical operations.....	29
3.5 Examples of problem solving.....	30
3.6 Exercises.....	31
3.7 Control questions.....	35
4 ADDITION OF INTEGER BINARY NUMBERS.....	36
4.1 Adding binary numbers	36
4.2 Exercises.....	40
4.3 Process of obtaining results.....	42
4.4 Control questions.....	45
5 ADDITION AND SUBTRACTION OF FLOATING-POINT NUMBERS.....	46
5.1 Floating-point representation.....	46
5.2 Converting from decimal to binary (repetition of previous training).....	48
5.3 IEEE 754 Representations.....	49
5.4 Rules for adding of a floating-point format numbers.....	52
5.5 Floating-point precision and rounding.....	55
5.6 Exercises.....	58

5.7 Control questions.....	59
6 MULTIPLICATION OF BINARY NUMBERS.....	60
6.1 Commonly rules.....	60
6.2 Floating-point multiplication.....	62
6.3 Exercises.....	64
6.4 Control questions.....	64
7 DIVISION OF BINARY NUMBERS.....	65
7.1 Division of fixed-point numbers.....	65
7.2 Division of binary floating-point numbers.....	70
7.3 Exercises.....	72
7.4 Control questions.....	72
BIBLIOGRAPHY.....	73
