Contents

Preface.....	III
Key Symbols.....	1
Indexes and Other Signs.....	5
Abbreviations.....	7

Chapter 1 Statement of the Axial Turbine's Flow Path

Optimal Design Problem.....	9
1.1 Mathematical Models and the Object Design Problem.....	11
1.2 Optimization of Complex Technical Devices.....	14
1.2.1 Design Hierarchy.....	14
1.2.2 A Numerical Method for the Implementation of the Multilevel Optimization Approximation Schemes.....	17
1.3 Building Subsystems FMM.....	18
1.3.1 FMM Basics.....	18
1.3.2 The Method of Improving the FMM Accuracy.....	20
1.4 Optimization Methods.....	23
1.4.1 General Information About the Extremal Problems.....	23
1.4.2 Nonlinear Programming.....	30
1.4.3 Methods for Optimization of Hardly Computable Functions.....	41
1.5 The Practice of Numerical Methods Usage for Local Leveled Optimization Problems Solution.....	43
1.5.1 Solution of the Multi-Criteria Optimization Problems.....	44
1.5.2 The Numerical Solution of the Optimization Problem with the Multimodal Objective Function.....	45
1.5.3 The Method of Optimization Taking into Account Turbine Operating Modes.....	46

Chapter 2 Mathematical Modelling of the Turbomachine

Flow Path Elements.....	49
2.1 Equations of State.....	51
2.2 Aerodynamic Models.....	52
2.2.1 Axisymmetric Flow in the Axial Turbine Stage.....	52

2.2.2	Aerodynamic Calculation of the Axial Turbine Stage in Gaps.....	61
2.2.3	Off-Design Calculation of Multi-Stage Steam Turbine Flow Path.....	76
2.2.4	Simulation of Axisymmetric Flow in a Multi-Stage Axial Turbine.....	84
2.2.5	Cascades Flow Calculation.....	93
2.2.6	Computational Fluid Dynamics Methods.....	95
2.3	Geometric and Strength Model.....	99
2.3.1	Statistical Evaluation of Geometric Characteristics of the Cascade Profiles.....	99
2.3.2	Strength Models.....	103
2.4	Flow Path Elements Macromodelling.....	103
2.5	Thermal Cycles Modelling.....	105
Chapter 3 Determining the Optimal Stages Number of Module and the Heat Drop Distribution.....		109
3.1	Analytical Solutions.....	111
3.2	Preliminary Design of the Multistage Axial Flow Turbine Method Description.....	129
3.2.1	Methods of the FP Synthesis.....	132
3.2.2	Detailed Thermal Calculation.....	136
3.2.3	Optimization.....	138
Chapter 4 Optimization of the Axial Turbine Parameters Along the Stage Radius.....		141
4.1	Formulation of the Problem.....	143
4.2	The Impact of Leaks on the Axial Turbine Stages Crowns Tw ist Law's.....	145
4.3	The Axial Turbine Stage Optimization Along the Radius in View of Leakages.....	155
4.4	The Effect of Tangential Lean on the Characteristics of Axial Turbine Stage.....	159

Chapter 5 Optimal Cascades Profiling	165
5.1. The Cascade's Basic Geometry Parameters Optimization.....	167
5.2 Profiles Cascades Shaping Methods	170
5.2.1 Turbine Profiles Building Using Power Polynomials.....	171
5.2.2 Profiles Building Using Besier Curves.....	177
5.3 Optimization of Geometric Quality Criteria.....	182
5.4 Minimum Profile Loss Optimization.....	188
5.5 Optimal Profiling Examples.....	192
Chapter 6 Application of Computational Aerodynamics for Blades Shape Optimization	201
6.1 Problem Statement.....	203
6.2 Representation of Blades Geometry.....	205
6.2.1 File Formats for Blades Storage.....	205
6.2.2 Stacking.....	206
6.2.3 Forming the Lateral Surfaces of the Blades.....	207
6.2.4 Three-Dimensional the Turbine Blade Parametric Model.....	208
6.2.5 The Grids Construction.....	209
6.2.6 File Format for Grids Storage.....	212
6.3 <i>CFD</i> Tools.....	213
6.4 Algorithm of Spatial Aerodynamic Optimization of the Blade Cascades of Axial Turbines.....	214
6.5 The Impact of Simple Tangential Lean on the Flow Through the Turbine Circumferential Cascade.....	215
6.6 The Influence of Complex Tangential Lean on the Flow in Circumferential Turbine Cascade.....	219
6.7 Optimization with the Mass Flow Rate Preservation Through the Cascade.....	224
6.7.1 Optimization with Various <i>all</i> Using Method 1.....	225
6.7.2 Optimization with Various <i>a//</i> Using Method 2.....	230
6.7.3 Reasons of Increasing the Efficiency of Optimized Cascades.....	234

Chapter 7 Experience and Examples of Optimization of Axial Turbines Flow Paths.....	239
7.1 Multi-Criterion Optimization of HPC of Powerful Steam Turbines at Nominal Operational Mode.....	241
7.1.1 A Preliminary Study of Influence of Quality Criteria Weights Coefficients on the Optimization Results.....	241
7.1.2 Optimization of HPC Parameters of the 220 MW Capacity Turbine for Nuclear Power Plant.....	243
7.1.3 Optimization of High-Pressure Cylinder Parameters of the 330 MW ⁷ Capacity Turbine.....	245
7.1.4 Optimization of the HPC Flow Path Parameters of the 540 MW Capacity Turbine.....	247
7.2 Optimal Design of the Axial Turbines Flow Paths Taking into Consideration the Mode of Operation.....	250
7.2.1 Optimization of Rendering Turbine Expander Unit (RTEU) Flow Path of 4 MW Capacity With Rotary Nozzle Blades.....	250
7.2.2 Optimal Design of Gas Turbine Flow Path Considering Operational Modes.....	258
References.....	269
