Psychology of **Creativity**

Natalia I. Hughson, M. D.
Richard T. Hughson

Creativity, Inspiration, Insight

If you want something done right do it yourself!

Artists, writers, scientists, managers, psychologists, educators, or anyone who creates. Are you looking for inspiration, words, a way to express yourself? Would you like to destroy the myth that creativity is a mysterious gift for only a chosen few. Would you like to know exactly what to do and sooner rather than later? Would you like to find yourself by losing yourself in your art form rather than be derailed by distractions to your real purpose in life? Have you attended classes, workshops, discussion groups, and seminars that had you asking why you were there in the first place. Do you admire the special insights provided by Stephen Hawking and Howard Zinn? Would you like to do the same for your field of interest that they have done for physics and history. If so this is the book for you.

Amazing Books

Want to spark your creativity? Open cover before striking here.

Stop waiting for the “great idea” to come and go after it at our website www.creativityonline.tv. From charming images to awe inspiring books that make you go WOW, our collection will make you sit up and take notice.
