## CONTENT

<i>Biletskyi Y. O.</i> Energy-shaping control systems for permanent magnet synchronous motor as port-control hamiltonian system.....	3
<i>Boychuk B. H., Kaluzhny B. S., Tsyapa V. B.</i> Structured polynomials characteristic for synthesis of automatic control.....	10
<i>Varetsky Y., Horban V., Pazuna Y.</i> Changes of voltage in electrical micronetwork with hybrid power plant.....	17
<i>Gapanovych V. G., Bachor Z. M.</i> Design of a regulator of static thyristor compensation unit for electrical power supply system of mining load.....	24
<i>Hladkyj V.</i> Mathematical model of asynchronous motor taking into account deep bar effect.....	30
<i>Golovach I. R., Karpluk L. F., Panchenko B. Y., Tsyapa V. B.</i> The control system of the drive crank mechanism with nonlinear feedbacks.....	37
<i>Diachenko N., Baran P., Kidyba V., Pryshlyak Y.</i> System self-training computer simulator from management of electric part of power unit TPS.....	43
<i>Diachenko N. B., Durniak B. I.</i> Research of influence of errors of quantization of teleinformation on results of neuromathematical modelling.....	48
<i>Konoval V., Kozovyi A.</i> Modeling synchronous machines overexcitation limiters to analyze power system stability.....	53
<i>Kutsyk A. S., Semeniuk M. B., Misiurenko V. O.</i> Mathematical modeling of a synchronous generator modes with pulse width regulation of an excitation.....	61
<i>Kuchansky V. V.</i> Express-assessment of resonance overvoltage on abnormal modes in main electrical power grids.....	67
<i>Lysiak G. M., Ostrovka I. I., Sabadash I. O.</i> Square-integrated method of identification of emergency situation of line transmission.....	71
<i>Lozynskyy O. Yu., Paranchuk Ya. S.</i> Structure of multiconnected control system for electrotechnological complex "arc steelmaking furnace - supply network" modes control.....	79
<i>Malyar V., Hamola O., Maday V., Havdo I.</i> The study of single phasing mode of three-phase asynchronous motor.....	85
<i>Moroz V., Oksentyuk V., Bolkot P., Snitkov K.</i> Effect of the data bit width on the angle accuracy of the induction sensors .....	90
<i>Pokrovsky K., Kuzhelev M.</i> Assessment of efficiency of wind farms based on data from public sources.....	97
<i>Ravlyk O. M., Stecyk V. J.</i> Simulation of switching processes in lines extra-high voltage 750 kV.....	102
<i>Fediv Y. I., Sivakova O. M.</i> Reactive power compensation in power supply systems with power rectifiers.....	107
<i>Jatsnn M. A.</i> Correlation of inductances of leakage screened cylindrical align windings on ferromagnetic to the core.....	113

### OPERATING EXPERIENCE

<i>Seheda M. S., Dudurych O. B.</i> Basical aspects of integration wind plants in electric system.....	116
<i>Gapanovych V. G., Kidyba V. P.</i> Limitation of magnetization current inrushes in electrical power supply system of electric arc steel-smelting furnace with preliminary commutation of the furnace.....	119
<b>Abstracts</b> .....	126
