TABLE OF CONTENTS

INTRODUCTION

CHAPTER 1. CONCEPTUAL FOUNDATIONS OF EVENT-BASED RISK ENGINEERING

- 1.1. Features of the formation of the vector of safe human development in a sociotechnical environment
- 1.2. The transformation of conceptual patterns describing the nature of the term
- 1.3. Adaptive risk assessment methods in the human development security system
- 1.4. The problems of existing risk assessment methods and new tasks for modern risk-forming systems

CHAPTER 2. RISK AS A TEMPORARY PARADIGM

CHAPTER 3. RISKS FROM THE PERSPECTIVE OF REGULATED EVENTFULNESS

- 3.1. Fundamental aspects of event-based risk interpretation
- 3.2. Regulated eventfulness and applied aspects of risk

CHAPTER 4. EVENT RISKS FROM THE PERSPECTIVE OF ENTROPY OF SYSTEMS

- 4.1. Thermodynamic entropy as an indicator of event risk
- 4.2. Related information as an indicator of the entropy of event risk
- 4.3. Summary

CHAPTER 5. EVENT-BASED RISKS IN HUMAN-MACHINE SYSTEMS

- 5.1. Functional risks in applied event relations
- 5.2. Applied aspects of risk formation in human-machine systems

CHAPTER 6. MODERN SEMANTICS AND MEANING OF THE TERM

- 6.1. Synonymy and affiliation of the term
- 6.2. The semantic content and features of the term
- 6.3. The designation of the term and compliance with modern requirements

CHAPTER 7. MATHEMATICAL METHODS OF EVENT RISK ANALYSIS

- 7.1. Tools for describing and managing event risks
- 7.2. Perceptron as a model for predicting event risks

CHAPTER 8. APPLICATION OF NEURAL NETWORKS TO EVENT RISK MANAGEMENT

- 8.1. Solving applied problems in the field of event risk forecasting
- 8.2. Algorithmizing of tasks in the field of event risk forecasting
- 8.3. Recurrent neural networks with feedback applied to event risk models
- 8.4. The area of the claim of deep recurrent RNN networks in assessing event risks

CHAPTER 9. THE USE OF NEURAL NETWORKS FOR THE ASSESSMENT AND FORECASTING OF EVENT RISKS IS DESCRIBED

- 9.1. The specifics of risk assessment in project management
- 9.2. Event risks and scenarios of the Paddington disaster
- 9.3. Investigation of the risks associated with rope jumping
- 9.4. Experience in predicting risks associated with mechanical damage to human bone tissue using recurrent neural networks

CHAPTER 10. A DECENTRALIZED MANAGEMENT SERVICE FOR USERS OF EVENT RISK

ASSESSMENT METHODS

CONCLUSION

LITERATURE
